

Permafix Varnished Resin ® DATA SHEET

Polyurethane resin-based agent for sealing and coating stamped concrete and natural stone floors.

Composition

Polyurethanes based sealer. Permafix Varnished Resin is an acrylic sealer that forms a high-build protective film on the concrete surface that provides excellent resistance to abrasion and chemicals. It is solvent-transparent based liquid.

Features and Applications

- Floors in high-traffic areas, to provide good resistance to scuffs and staining
- To enhance the beauty of colored stamped, concrete countertops and stone floors

How to apply

Permafix Varnished Resin can be applied with micro-fiber mop, or roller. Also it can be applied with a high-pressure airless sprayer.

Clean well the surface before applying the Varnished Resin and make sure is dry and free of dust.

Cautions and recommendations

Wear gloves, respiratory mask, and protective goggles when applying the product.

Very inflammable product.

Packaging

20 Ltrs in plastic sealed buckets.

Shelf life: 2 years in sealed original packaging.
